P.O. Box 92.
H-7701

fulfils the formaldehyde requirements of the **IKEA** and compiles with the
Final Regulations Order (FRO) of the Airborne Toxic Control Measure
(ATCM) as initiated by the California Air Resources Board

CCR-17-93120.12(a) CARB Phase 2

&

IKEA-IO5-MAT-0003 AA-10899-9 (2009-10-09), table 2.1.A, part 1,
far wood-based products with the limit of 5,00 mg/100g based on
perforator test method in accordance with MSZ EN 120:1996.

Disclaimer:

1. The relevant measurement procedure is in any case the perforator method according to MSZ EN 120:1996.
2. Products can only be claimed based upon test results of 2 certified institutes, at least one by the choice of Kronospan. Tests have to be done by perforator method showing that measured value exceeds the limit value including the measurement tolerance.
3. Any claim will be solely governed by the relevant Kronospan sales, delivery and payment condition.
4. Self declarations and external supervision reports will only be submitted every 3 month, whereas the trimming depends on the inspection cycle of our external and certified supervision institute (EPH – TPC No. W-08-10).
5. Customer specific conditions or specifications are excluded.
6. In case of different opinion between the parties the normal and rules of the EU are valid.
